About **Astros**

Trusted Business Partner

Our mission is clear.
Value creation, global connectivity, sustainable collaboration, and community contribution.

COMPANY INTRODUCTION

Astros places value creation as the top priority among all its activities, and this commitment has become a core value of its management.

We believe that true success does not end with financial performance alone, but is realized through the positive impact we create for our customers, employees, and further, the local community.

In particular, in an era where connection is increasingly emphasized, we deeply understand that global partnerships and collaboration are essential driving forces for sustainable growth. To this end, by remaining closely connected with the global market, we strive to open doors to new opportunities and contribute to the collective development of both the industry and society as a whole.

Our company shares common goals of success, sustainability, a stable foundation, and we actively respond to the changes in the global economy while keeping pace with the dynamics of international trade.

Astros identifies strategic businesses that it can confidently undertake and promotes them within a stable framework, concentrating all its capabilities on building a flexible and forward-looking business model even amid the rapidly changing global economy.
Furthermore, grounded in our firm commitment to social contribution, we will do our utmost to meet the needs of the local community and create a future in which we prosper together.

Astros **History**

A record of Astros' journey constant change and growth.

Since its establishment in 2018, Astros has continued its steady growth, powered by the extensive experience accumulated in the trade sector and a solid human network.
We continuously seek new business opportunities on the global stage for a greater leap forward, moving toward the future.

· Launched used construction equipment export business

FOOD & MEAT

IMPORTED MEAT

Astros meticulously manages every step of the process, from the transportation of imported meat to customs clearance, ensuring the highest level of freshness that customers can always trust and choose.

Business Overview

Astros operates a business that directly imports and distributes products, focusing on Brazilian chicken and pork, from outstanding livestock producers overseas.

Astros is developing a direct import and distribution business, centered on Brazilian poultry and pork, through partnerships with outstanding livestock producers that have been verified in the global market. We work with large Brazilian processing companies that meet international hygiene and quality standards, and we meticulously manage the entire process—from slaughtering and processing at the place of origin to maritime transportation and domestic inventory control. We also collaborate with premium meat producers in Europe, Australia, and the United States, establishing a stable supply system that meets the diverse needs of our customers.

All products we handle are certified with international food safety standards such as HACCP and are guaranteed in quality through thorough hygiene inspections conducted before and after shipment.
The imported products maintain optimal freshness through professional refrigerated and frozen logistics chains, as well as livestock specialized cold storage facilities for warehousing and inventory management, enabling flexible response from large volume supply to small quantity orders.
Astros will continue to provide reliable livestock supply solutions based on our global sourcing capabilities and robust logistics management.

- **Pork** ··· Single ribbed belly ··· Shoulder ··· Collar ··· Neck Bone
- **Poultry** ··· Bone-in Whole leg meat ··· Boneless Whole leg meat ··· Kakugiri (Boneless whole leg meat) ··· Gizzard ··· Feet

COMMODITY

GRAIN

Astros supplies major grains from the Central and South American region by systematically managing the entire process—from production site oversight to shipment and logistics—to ensure stable quality and supply

Business Overview

Astros actively conducts grain sales targeting Korea, Japan, Taiwan, Vietnam, and the Middle East, based on premium quality grains from Latin America.

Through strategic partnerships with world-leading grain producers, we supply high-quality Non-GMO corn grown by eco-friendly methods, sesame, soybeans, vegetable oils and more to Asian and Middle Eastern markets. These grains serve diverse industries including confectionery, bakery, cereal, pet food, and beer manufacturing, providing a global grain solution combining both quality stability and supply flexibility. Astros is a trusted partner for a sustainable food industry, consistently supplying high-quality grains that meet client requirements.

Main Products

INFRASTRUCTURE

RAILWAY

Astros provides supply and support services for used diesel locomotives, electric multiple units, and major railway components, tailored to overseas railway operating environments.

Business Overview

Astros conducts export operations for used diesel locomotives, electric multiple units, and major components, targeting the global railway market.

After sourcing various models of used diesel and electric locomotives, we supply them according to customer specifications through refurbishment, providing CKD (Complete Knock Down) supply along with on site assembly support and maintenance as a one-stop service.

Based on our global network across North America, South America, Asia, the Middle East, and Africa, we have carried out the entire process of procurement, dismantling, transportation, installation, and commissioning. With extensive project experience with numerous railway operators and government agencies, we have established ourselves as a reliable and capable railway supply partner

Main Products

Used Diesel Locomotives

Locomotive Parts

Track Maintenance Equipment

INFRASTRUCTURE

CONSTRUCTION EQUIPMENT

Astros supplies new and used Korean construction machinery, focusing on equipment suitable for on-site operations, to the global market at competitive prices.

Business Overview

Astros supplies major construction machinery—including excavators, loaders, and cranes—focusing on new equipment and fully serviced used equipment for overseas markets.

Through cooperation with domestic manufacturers and partner maintenance companies, we thoroughly check the equipment condition and its operability before exporting it—according to the characteristics of regions with high demand, such as South America and the Middle East.

In addition, by supplying the major components required for operating used equipment, we also support continuity in field operations.Based on a distribution and logistics network specialized in Korea, South America, and the Middle East, Astros flexibly responds to the diverse needs of customers and is establishing itself as a reliable partner for a sustainable construction industry
