About **Astros**

Trusted Business Partner

Our mission is clear.
Value creation, global connectivity, sustainable collaboration, and community contribution.

COMPANY INTRODUCTION

Astros places value creation as the top priority among all its activities, and this commitment has become a core value of its management.

We believe that true success does not end with financial performance alone, but is realized through the positive impact we create for our customers, employees, and further, the local community.

In particular, in an era where connection is increasingly emphasized, we deeply understand that global partnerships and collaboration are essential driving forces for sustainable growth. To this end, by remaining closely connected with the global market, we strive to open doors to new opportunities and contribute to the collective development of both the industry and society as a whole.

Our company shares common goals of success, sustainability, a stable foundation, and we actively respond to the changes in the global economy while keeping pace with the dynamics of international trade.

Astros identifies strategic businesses that it can confidently undertake and promotes them within a stable framework, concentrating all its capabilities on building a flexible and forward-looking business model even amid the rapidly changing global economy.

Furthermore, grounded in our firm commitment to social contribution, we will do our utmost to meet the needs of the local community and create a future in which we prosper together.

HISTORY

A record of Astros' journey constant change and growth.

Since its establishment in 2018, Astros has continued its steady growth, powered by the extensive experience accumulated in the trade sector and a solid human network.
We continuously seek new business opportunities on the global stage for a greater leap forward, moving toward the future.

- Signed an annual contract for imported pork

2023

- Expanded food import business (bakery & own distribution)

2022

- Achieved an annual revenue of USD 10 million

2021

- Launched COVID-19 diagnostic kit export business
- Launched distribution of imported pork

2020

- Launched importing rocket propellants for defense industry use
- Launched distribution of imported poultry

2019

- Annual revenue reached USD 2 million
- Launched railway & locomotive export business
- Started food import business (Southeast Asian HMR)

2018

- Company founded

FOOD & MEAT

IMPORTED MEAT

Astros meticulously manages every step of the process, from the transportation of imported meat to customs clearance, ensuring the highest level of freshness that customers can always trust and choose.

Business Overview

Astros operates a business that directly imports and distributes products, focusing on Brazilian chicken and pork, from outstanding livestock producers overseas.

Astros is developing a direct import and distribution business, centered on Brazilian poultry and pork, through partnerships with outstanding livestock producers that have been verified in the global market. We work with large Brazilian processing companies that meet international hygiene and quality standards, and we meticulously manage the entire process—from slaughtering and processing at the place of origin to maritime transportation and domestic inventory control. We also collaborate with premium meat producers in Europe, Australia, and the United States, establishing a stable supply system that meets the diverse needs of our customers.

All products we handle are certified with international food safety standards such as HACCP and are guaranteed in quality through thorough hygiene inspections conducted before and after shipment. The imported products maintain optimal freshness through professional refrigerated and frozen logistics chains, as well as livestock specialized cold storage facilities for warehousing and inventory management, enabling flexible response from large volume supply to small quantity orders. Astros will continue to provide reliable livestock supply solutions based on our global sourcing capabilities and robust logistics management.

COMMODITY

GRAIN

Astros supplies major grains from the Central and South American region by systematically managing the entire process—from production site oversight to shipment and logistics—to ensure stable quality and supply

Business Overview

Astros actively conducts grain sales targeting Korea, Japan, Taiwan, Vietnam, and the Middle East, based on premium quality grains from Latin America.

Through strategic partnerships with world-leading grain producers, we supply high-quality Non-GMO corn grown by eco-friendly methods, sesame, soybeans, vegetable oils and more to Asian and Middle Eastern markets. These grains serve diverse industries including confectionery, bakery, cereal, pet food, and beer manufacturing, providing a global grain solution combining both quality stability and supply flexibility.

Astros is a trusted partner for a sustainable food industry, consistently supplying high-quality grains that meet client requirements.

Main Products

INFRASTRUCTURE

RAILWAY

Astros provides supply and support services for used diesel locomotives, electric multiple units, and major railway components, tailored to overseas railway operating environments.

Business Overview

Astros conducts export operations for used diesel locomotives, electric multiple units, and major components, targeting the global railway market.

After sourcing various models of used diesel and electric locomotives, we supply them according to customer specifications through refurbishment, providing CKD (Complete Knock Down) supply along with on site assembly support and maintenance as a one-stop service.

Based on our global network across North America, South America, Asia, the Middle East, and Africa, we have carried out the entire process of procurement, dismantling, transportation, installation, and commissioning. With extensive project experience with numerous railway operators and government agencies, we have established ourselves as a reliable and capable railway supply partner

Main Products

INFRASTRUCTURE

CONSTRUCTION EQUIPMENT

Astros supplies new and used Korean construction machinery, focusing on equipment suitable for on-site operations, to the global market at competitive prices.

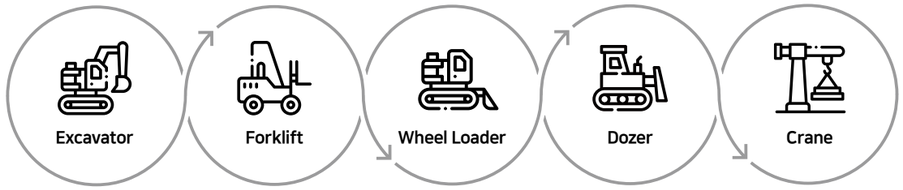
Business Overview

Astros supplies major construction machinery—including excavators, loaders, and cranes—focusing on new equipment and fully serviced used equipment for overseas markets.

Through cooperation with domestic manufacturers and partner maintenance companies, we thoroughly check the equipment condition and its operability before exporting it—according to the characteristics of regions with high demand, such as South America and the Middle East.

In addition, by supplying the major components required for operating used equipment, we also support continuity in field operations.Based on a distribution and logistics network specialized in Korea, South America, and the Middle East, Astros flexibly responds to the diverse needs of customers and is establishing itself as a reliable partner for a sustainable construction industry

Main Products



DEFENSE

OXIDIZER

As an exclusive Korean distributor for leading overseas manufacturers, Astros has been supplying domestic defense companies since 2019.

Business Overview

Oxidizers play a critical role in generating the thrust of rockets.
They are used in various types of defense products including Medium / Short range Anti air /ground rocket and drag-reducing agents used to extend range, requiring high precision and the highest quality.

As the exclusive Korean distributor for leading overseas manufacturers, Astros has been supplying domestic defense companies since 2019. As the global preference for K-defense products increases, Astros strives to supply high-quality overseas products in a timely manner to meet growing demand.

Business Overview

Ammonium Perchlorate

potassium perchlorate

DEFENSE

DEFENSE PRODUCT BROKERAGE

Astros plays a bridging role in the overseas export of leading Korean defense products, built upon the experience we have accumulated as a major general trading company.

Business Overview

Drawing on the experience of a major trading company, Astros serves as a bridge for the overseas export of Korea's leading defense products.

We connect domestic shipyards capable of constructing various vessels — from Patrol boat for coast guard / navy — tailored to each country's ROC (Required Operational Capability) at optimal conditions, contributing to the expansion of K-defense exports.
We are also pursuing the overseas market entry of domestic SME defense products such as unmanned patrol vessels and special-purpose drones, adapting to the rapidly changing 21st-century battlefield environment.

Business Overview

IMPORTED FOOD

Based on the know-how of the trading business that requires business trips around the world, Astros supplies tastier and healthier food products to the domestic market.

Business Overview

Astros introduces a wide variety of imported food products to the Korean market, backed by extensive overseas experience through trading operations.

Astros imports various food products from Southeast Asian countries, including processed seafood, ready-to-eat meals, bakery products, and beverages, and supplies them through various online platforms, home shopping channels, and franchise restaurants.

In addition, Astros imports and distributes distinctive food items from European countries such as bakery products and truffle-based products.

Bakery Products

OBROK

In collaboration with Mlinar, Croatia's leading bakery brand, Astros operates 'Obrok' — Korea's only authentic Balkan bakery.

Business Overview

Using dough directly imported from Mlinar, Croatia's premier bakery brand, Obrok introduces fresh and wholesome bread to consumers every day.

Obrok's first store is located in Nonhyeon-dong, Gangnam-gu, Seoul, and since its opening in September 2024, it has garnered a strong positive response from customers.

With diverse revenue models including dine-in, takeout, delivery, and group orders, Obrok leverages stable direct-import supply, competitive cost structure, and premium European bakery ingredients — and is now preparing for franchise expansion.

COMMODITY

ORGANIC FERTILIZER

In collaboration with BEF, Korea's largest organic material resource company, Astros exclusively supplies premium BEF products to key agricultural nations in Asia

Business Overview

Soil is the foundation of human life and a precious asset for the future.
Due to the overuse of chemical fertilizers, soil in many agricultural nations has been depleted, causing significant future resource losses.
Many advanced nations, led by the EU, have legislated that only products grown using organic fertilizers may be imported — forming the basis for safe food and healthy, regenerable soil.

In collaboration with BEF, Korea's largest organic material resource company, Astros exclusively supplies premium BEF products to leading agricultural nations in Asia (Vietnam, Laos, Cambodia).
Astros will focus its capabilities on promoting healthy agricultural produce and protecting future resources.

BEF

A company that opens the future with a commitment to people and the environment.

COMMODITY

CHEMICAL MATERIALS

Astros supplies high-purity chemical products to the market, including high-purity aluminum powder for medical devices and Butyl Butyrate for secondary batteries.

Business Overview

The advanced device market, which continues to advance daily, demands high-precision, high-purity materials.

Astros supplies high-purity chemical products to the market, including high-purity aluminum powder used in medical measurement devices and Butyl Butyrate, a key material for secondary batteries.

Astros's product-related network, specialized in Europe, South America, and China, provides optimal solutions from sourcing to on-time delivery for the products clients require.

Main Products

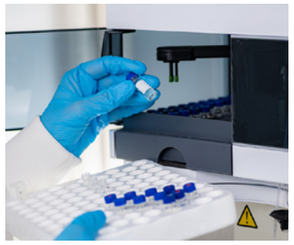
Metal Powder

Chemical Reagents

MEDICAL EQUIPMENT

DIAGNOSTICS

Astros exports high-quality domestic nucleic acid extraction equipment and reagents.



Business Overview

Nucleic acid extraction is a very important step in life science research and diagnostics.
It is a technology that isolates DNA and RNA from cells to obtain the nucleic acids required for PCR testing, and Astros exports high quality nucleic acid extraction equipment and reagents produced in Korea.

Nucleic acid extraction involves isolating DNA and RNA from cells for PCR-based diagnostics.
The equipment and reagents Astros exports are also used at international airports for immigration control, thanks to their extraction accuracy and speed.
During the COVID-19 period, the nucleic acid extraction reagents that were used at numerous sites for PCR testing are now being utilized beyond the COVID period, and are currently applied in various diagnostic fields, including HIV testing.
